

BEAT FLAVOR FATIGUE WITH DELICIOUS PROTEIN MILKSHAKES

The Issue: Unintentional Weight Loss and Unsatisfying Shakes

Unintentional weight loss affects many residents in senior living and long-term care facilities. Older adults turn to protein and nutritional shakes to supplement much-needed protein and calories in their diets.

BUT TOO OFTEN, FLAVOR IS OVERLOOKED.

The Solution: Delicious Milkshakes Made With Real Ice Cream

Taste matters! Your patients and residents are far likelier to consume the entire serving of a protein shake if it's easy to drink and delicious. It's a win-win—good for your consumers and for your foodservice operation.
